## **Executive Summary**

The Department of Health- Abu Dhabi (DOH) is the regulatory body of the healthcare sector in the Emirate of Abu Dhabi and ensures excellence in healthcare for the community by monitoring the health status of its population.

The Emirate of Abu Dhabi is experiencing a substantial growth in the number of hospitals, centers and clinics. This is ranging from school clinics and mobile units to internationally renowned specialist and tertiary academic centers. Although, access and quality of care has improved dramatically over the last couple of decades, mirroring the economic upturn and population boom of Emirate of Abu Dhabi, however challenges remain in addressing further improvements.

The main challenges that are presented with increasingly dynamic population include an aging population with increased expectation for treatment, utilization of technology and diverse workforce leading to increased complexity of healthcare provision in Abu Dhabi. All of this results in an increased and inherent risk to quality and patient safety.

DOH has developed dynamic and comprehensive quality framework in order to bring about improvements across the health sector. This guidance relates to the quality indicators that DOH is mandating be collected and monitor by all Outpatient medical center provider in Abu Dhabi.

The guidance sets out the full definition and method of calculation for patient safety and clinical effectiveness indicators. For enquiries about this guidance, please contact [jawda@DoH.gov.ae](mailto:jawda@DoH.gov.ae)

This document is subjected for review and therefore it is advisable to utilize online versions available on the DOH at all times.

Issued: December 2024 Version 1

Effective from Q1 2025 Version 1

### **About this Guidance**

The guidance sets out the definitions and reporting frequency of JAWDA Outpatient Medical Centers & Clinics performance indicators. The Department of Health (DoH), with consultation from local and international expertise of chronic disease management has developed Outpatient medical centers performance Indicators that are aimed for assessing the degree to which a provider competently and safely delivers the appropriate clinical services to the patient within the optimal period of time.

The Jawda KPI for Outpatient medical center in this guidance include measures to monitor i.e. how well Outpatient medical center service providers care for their patients, how often they follow best practices and how effective they are at keeping patients healthy, and how patients feel about their experience at Outpatient medical center service providers. Healthcare providers are the most qualified professionals to develop and evaluate quality of care for people with chronic conditions; therefore, it is crucial that clinicians retain a leadership position in defining performance among Outpatient medical center healthcare service providers.

#### **Who is this guidance for?**
